EDUCATION

Virginia Polytechnic Institute & State University
Bachelor of Science in Computer Science

Aug 2022 - Dec 2026 (Expected)
GPA: 3.53 / 4.0

SKILLS

Java, JavaScript, TypeScript, Python, Node.js, Next.js, HTML, Git, PostGres, Linux, React, Supabase, Jira, MS Office

EXPERIENCE

Full Stack Developer /AI Engineer Intern — Uplifty AI, NY Oct 2025 - Mar 2026

- Developed backend/frontend of mobile application including user settings, notification system, and Supabase-based data aggregation functions for weekly highlight generation.
- Developed a personal AI agent that generates personalized recommendations based on user activity.

Frontend Developer Intern — GBCS Group, Remote May 2025 - August 2025

- Developed a feedback page of a website and implemented redirection logic to support site navigation.
- Resolved UI and functionality bugs to enhance user experience and improved website security.

Undergraduate Researcher — OpenFLAP, Blacksburg, VA Jul 2026 - Present

- Developed and improved interactive automata exercises and visualization tools using JavaScript for 'Formal Languages and Automata' course, collaborating with students and professors from Duke University.

Undergraduate Researcher — DBWorkout, Blacksburg, VA Aug 2026 - Present

- Debug application issues and integrate Virginia Tech authentication, enabling students to securely sign in using their university credentials.

Undergraduate Teaching Assistant — Virginia Tech, Blacksburg, VA Aug 2026 - Present

- Assist instruction for 200+ undergraduate students in an introductory software programming course.

Vice President — Korean Student Association, Virginia Tech, Blacksburg, VA May 2023 - May 2025

- Organized social and cultural events to promote Korean traditions and supported new Korean students with settling into the Virginia Tech community.

Undergraduate Researcher — Codekids, Blacksburg, VA Jan 2026 - May 2026

- Designed AI-supported classroom activities for history and language learning.
- Developed interactive exercises to improve student engagement and critical thinking.

PROJECTS

Voxentry

- Developed a voice-based assistant for real-time transcription, translation, and analysis in interview settings.
- Implemented features for speaker detection, risk indicators, and live interaction to support decision-making.

BeeAI

- Built a deep learning image classifier using PyTorch and MobileNetV2 to distinguish bees vs. wasps, achieving ~87% validation accuracy.
- Deployed the model on Hugging Face Spaces and integrated it into a personal website for live demos.
